satisfaction

The original position
just got better!

the lover's doggie style position strap™:

Features:

- Better leverage for the person on top
- Compresses vaginal canal and creates “tighter” sensation
- Side straps eliminate need to hold “love handles” and reduce marks
- Allows for deeper penetration
- Improves orgasms
- Adjusts for better control

Getting down on all fours was never so much fun! The Lover's Doggie Style Position Strap allows couples to experience the same position with comfort, support and intensity.

Tips and Techniques for Better Use

While you are on your hands and knees, your partner can wrap the "Doggie Strap" around your waist and hold onto the handles of the straps behind you. With the strap in place, your partner can pull you intensely close for extremely intimate contact. This also allows for very deep penetration and G-spot stimulation, without having your "love handles" grabbed. The Doggie Strap relieves embarrassment and insecurity by giving the man something else to grab onto other than his partner's tender flesh.

The “Wheelbarrow”

You can play “wheelbarrow” by using the Doggie Strap to gently raise your partner off the ground.

The thick, padded strap will not dig or cut into the wearer’s waist.

Location is Everything

Try moving the location of the strap for different sensations. When placed low on the abdomen, the Doggie Strap puts pressure on the wearer and causes compression of the vaginal canal. This creates a tighter feeling for the man during intercourse and a more intense sensation for both partners.

This strap also gives the woman more control in the missionary position. When you wrap it around him, you can pull him closer for deep penetration and help control his thrusting.
